Experience

Operations Specialist, Southwest Self Storage, Redlands, CA

Nov 2024 – present

- Cut past-due balances by 13% after configuring SMS automation in CallPotential via Sitelink ERP API
- Built the COO a competitor pricing dashboard in Python and Playwright that auto updates in Google Sheets, replacing the weekly manual spreadsheet
- Identified and escalated a security vulnerability in our third-party AI vendor's S3 infrastructure that publicly exposed customer data and backups
- Built an AI pipeline that pulls tenant names from hundreds of unsearchable TIF scans and verifies lien letter compliance, replacing the manual process. Wrote the procedure doc
- Fixed long standing AMEX and Discover autopay failures that the team had been working around manually, traced it to the ERP billing config
- Run the full customer lifecycle for 500 tenants, from closing rentals to collections and billing/account issues

Partnership Coordinator, Null404, Remote

Apr 2026 –present

- Built an n8n pipeline on Oracle Cloud's free tier that syncs sponsor deal stages between Notion and HubSpot daily, serving a 2000-member cybersecurity Discord

Intern, The Advance Group, Remote

May 2023 – Aug 2023

- Vetted NYC organizations for partnership outreach and analyzed campaign data to inform legislative strategy for a councilmember client

Projects

AI Agent Orchestrator [Go · Claude Code · Codex] - [GitHub Repo](#)

- Built an agent orchestration tool that defines success criteria before each run and verifies output against evidence before approval. Most AI workflows just take the agent's word for it
- Coordinates Claude Code on implementation and Codex on review, passing context between the two

AWS RAG Chatbot [Bedrock · Pinecone · Lambda] - [Demo](#) / [GitHub Repo](#)

- Built a chatbot that answers AWS questions with source links, backed by ~120 pages of scraped documentation indexed in Pinecone
- Runs on Lambda with a CloudFront frontend for about \$2/month

Narrative Intel Engine [Python · FastAPI · Next.js] - [GitHub Repo](#)

- Pulls from 30 financial outlets and clusters articles into live narratives, scoring across 20 signal types. Back tests show sentiment polarization and institutional pickup lead price moves best, with 80% LLM accuracy
